VINCENZO (VINNY) R. D'ONOFRIO

NRAO STUDENT OBSERVING SUPPORT PROGRAM FELLOW

donofr19@tamu.edu | Website | ORCID

Research focus: galaxy formation and evolution across cosmic time with multiwavelength observations

EDUCATION

Texas A&M University — College Station, TX
Ph.D. Astronomy — *Expected May 2027*
Advisor: Dr. Justin Spilker
Thesis: Tracing Galaxy Evolution Across Cosmic Time with Post-Starburst Galaxies

M.S. Astronomy — *May 2025*
GPA: 3.92/4.00
Project: Quenching via Tidal Removal of Cold Gas in Intermediate-z Massive Post-Starburst Galaxies

Michigan State University — East Lansing, MI
B.S. Astrophysics — *May 2022*
GPA: 3.92/4.00 | Majors: Astrophysics, Physics

RESEARCH POSITIONS/EXPERIENCE

Graduate Student (Advisor: Dr. Justin Spilker) — August 2022 – Present
Texas A&M University — *College Station, TX*

Student Research Assistant (Advisor: Dr. Laura Chomiuk) — August 2021 – May 2022
Michigan State University Observatory Research Program — *East Lansing, MI*

NSF REU Intern (Advisor: Dr. Juergen Ott) — May 2021 – October 2021
National Radio Astronomy Observatory — *Socorro, NM (Remote)*

Student Research Assistant (Advisor: Dr. Kaitlin Cook) — June 2020 – May 2022
National Superconducting Cyclotron Laboratory — *East Lansing, MI*

Research Assistant (Advisor: Dr. Daniel Rathbun) — April 2019 – August 2019
Bionics and Vision Lab, Henry Ford Health System — *Detroit, MI*

HONORS AND AWARDS

TAMU Dept. of Physics & Astronomy Travel Award, **$1k** — January 2026

NRAO Student Observing Support Program Fellowship, **$40k** — November 2024

NSF Graduate Research Fellowship Program, **Honorable Mention** — April 2024

Texas Space Grant Consortium Graduate Fellowship, **$5k** December 2023

NSF Research Experiences for Undergraduates, ∼**$7k** June 2021

MSU College of Natural Science Undergraduate Research Support Scholarship, **$1k** January 2021

AWARDED PROPOSALS

Principal Investigator

5. **ALMA Cycle 13** - 2026.1.00767.S (21.9 hours): The Fate of Molecular Gas After the Burst: Tracing the Dense Gas Content in z∼0.7 Post-Starburst Galaxies (PI: **V. D'Onofrio**)
4. **VLA Semester 26A** - VLA/26A-427 (21.0 hours): What Powers the Radio? Morphological Constraints in High-z Post-Starbursts (PI: **V. D'Onofrio**)
3. **ALMA Cycle 12** - 2025.1.01006.S (12.7 hours): What's Left Behind: A Census of the Cold ISM in the First Massive Quiescent Galaxies (PI: **V. D'Onofrio**)
2. **ALMA Cycle 11** - 2024.1.01252.S (9.8 hours): Diffuse or Dense: Probing the Physical State of Massive Gas Reservoirs in z∼0.7 Quenched Galaxies (PI: **V. D'Onofrio**)
1. **VLA Semester 24B** - VLA/24B-451 (21.0 hours): Measuring Jet Ages to Test Radio AGN Feedback with Massive z∼0.7 Post-Starbursts (PI: **V. D'Onofrio**)

Co-Investigator

10. **ALMA Cycle 13** - 2026.1.01631.S (13.2 hours): Cracking the depletion time problem in CO-luminous post-starburst galaxies: 13CO as a test of the CO-to-H2 conversion (PI: D. Setton)
9. **ALMA Cycle 13** - 2026.1.01360.S (16.7 hours): Quenching, Fast and Slow: Molecular Gas in Green Valley Galaxies at z∼0.6 (PI: K. Suess)
8. **ALMA Cycle 13** - 2026.1.00570.S (30.3 hours): [CI]+CO Diagnostics of the Circumgalactic Medium of GS-9209, a Massive Quiescent Galaxy at z=4.658 (PI: F. Sun)
7. **Roman Cycle 1** - Proposal ID: 10244, Program ID: 19068 (Program Category: Small): Connecting Morphological Transformation to Rapid Quenching: Resolving the Structure of z∼1 Post-Starburst Galaxies with Roman (PI: J. Spilker)
6. **VLA Semester 26A** - VLA/26A-430 (45.0 hours): Are High-Redshift Quiescent Galaxies Gas-Rich but Dust-Poor? (PI: J. Spilker)
5. **ALMA Cycle 12** - 2025.1.01067.S (45.6 hours): Dust Rising from the ASHES: A Comprehensive ALMA Survey of Remnant Dust in the Earliest Quiescent Galaxies (PI: Z. Ji)

4. **ALMA Cycle 11 w/ JWST Cycle 3** - 2024.1.01064.S/JWST-GO-06719 (15.5/4.7 hours): Mapping Cold Gas and Star Formation in Gas Rich Post-Starburst Galaxies Near Cosmic Noon (PI: D. Setton)

3. **ALMA Cycle 11** - 2024.1.00216.S (13.1 hours): Timing the Onset of Unexpected Dust Destruction using High-Redshift Post-Starburst Galaxies (PI: J. Spilker)

2. **ALMA Cycle 10** - 2023.1.01012.S (12.1 hours): Does Molecular Gas Survive Quenching Near Cosmic Noon? (PI: D. Setton)

1. **ALMA Cycle 10** - 2023.1.00948.S (13.1 hours): Timing the Onset of Unexpected Dust Destruction using High-Redshift Post-Starburst Galaxies (PI: J. Spilker)

Leadership & Outreach

STEM Pen Pal — August 2025 – Present
Letters to a Pre-Scientist — *Texas A&M University*

Coordinator — February 2025 – Present
Mentoring and Advising Graduates in an Inclusive Community (MAGIC) — *Texas A&M University*

Coordinator — October 2023 – February 2025
Graduates Learning Astro and Soft Skills (GLASS) — *Texas A&M University*

***In the News* Presenter** — October 2023 – April 2026
Astronomy on Tap — *Bryan, TX*

Mentor — August 2023 – August 2026
Mentoring and Advising Graduates in an Inclusive Community (MAGIC) — *Texas A&M University*

Trivia Creator — May 2023 – July 2024
Astronomy on Tap — *Bryan, TX*

Astronomer/Physicist — October 2023 – Present
Adopt-a-Physicist — *Texas A&M University*

Student Mentoring

Aspen Presswood — TAMU undergraduate — Spring 2026

Radio variability in SQuIGG$\vec{L}$E galaxies with FIRST/VLASS.

Mary Knowlton — TAMU undergraduate; AggieSTAAR mentee — Summer 2025

Dust continuum observations of gas-rich SQuIGG$\vec{L}$E galaxies; publication in RNAAS.
Now a graduate student at Indiana University Bloomington.

Teaching Experience

Teaching Assistant, Lab Instructor — January 2024 – May 2024
ASTR 111: Overview of Modern Astronomy — *Texas A&M University*

Teaching Assistant — August 2023 – December 2023
ASTR 320: Astrophysical Research Methods — *Texas A&M University*

Teaching Assistant, Lab Instructor — January 2023 – May 2023
ASTR 111: Overview of Modern Astronomy — *Texas A&M University*

Teaching Assistant — August 2022 – December 2022
ASTR 401: Stars and Extrasolar Planets — *Texas A&M University*

Observation Experience

MSU Observatory 0.6-meter Telescope, **30 hrs**
